

Release Notes

Rev 4.0.0

April 2007

Version 4.0.0 (April 2007)

General

- 1) The Office Integration has been expanded to include Outlook. You can now select one or more emails to store within the IntraNomic Document Library module.
- 2) The Document Library Search (for the Browse and Maintenance Tabs) has been enhanced to also allow you to search within the previous (historical) versions of your content.
- 3) The "IntraNomic Statistics" module has been enhanced to display "Outlook Integration" statistics.
- 4) The Story Board module has been enhanced to allow you to switch the module "on or off". If the Story Board module is switched "off", you are not shown the Story Board Module options or the Story Board portal tab.
