

## **Upgrade Guide**

**Rev 1.1.0**

**July 2004**

## **Introduction**

This document has been created to help you upgrade your IntraNomic installation.

## The Upgrade

The following steps show you how to perform an IntraNomic upgrade:

- 1) Download the upgrade file from the “Download” section of the IntraNomic web site ([www.intranomic.com](http://www.intranomic.com))
- 2) Unzip the downloaded file to a temporary folder (e.g. c:\windows\temp)
- 3) Within the temporary folder double click on the “upgrade.exe” file
- 4) Click on the “Start” button to start the IntraNomic upgrade
- 5) Once the upgrade is complete, click on the “Exit” button
- 6) You can now remove the temporary folder
- 7) The IntraNomic upgrade is now complete

**Note:** You may also need to download and install the latest version of the “IntraNomic Client Components”, if you are installing the “IntraNomic Client Components” via the “Active Directory Group Policy”.
